Projects

AI Decision Intelligence Platform | Python, FastAPI, XGBoost, FAISS, SHAP, Scikit-learn, JavaScript **Apr' 26**

- Engineered a full-stack AI analytics platform to ingest CSV datasets and PDF/text documents for machine learning, predictive analytics, and decision-support workflows.
- Designed RESTful APIs for user authentication, dataset ingestion, document processing, model training, prediction generation, and task tracking using FastAPI and SQLAlchemy.
- Implemented XGBoost-based forecasting and classification pipelines with feature engineering, model evaluation, model persistence, and SHAP-based explainable AI for transparent predictions.
- Incorporated FAISS-based document retrieval and a retrieval-augmented generation assistant to answer grounded questions from uploaded reports and analytics outputs.
- GitHub Repository Link: <https://github.com/Gavisingh12/ai-decision-intelligence-platform.git>

AI-Powered Healthcare Assistance Dashboard | Python, Flask, SQL Alchemy, Jinja2, Google Maps API **Mar' 26**

- Created a healthcare web application that analyzes user-entered symptoms and generates AI-powered medical assessments with structured medication recommendations and care guidance.
- Devised a follow-up questioning workflow for disease-specific cases to improve response quality, personalize diagnosis results, and strengthen symptom-based decision logic.
- Established user authentication, consultation history management, email verification, PDF report generation, and session handling using Flask, SQLAlchemy, and Flask-Login.
- Incorporated Gemini API-powered response generation and Google Maps/Folium-based hospital locator functionality with appointment scheduling support.
- GitHub Repository Link: <https://github.com/Gavisingh12/ai-project.git>

Certificates

- Cloud Computing** **Oct' 25**
NPTEL -- [Certificate Link](#)
- Data Structures & Algorithms using C++** **Aug' 25**
CSE Pathshala -- [Certificate Link](#)
- Introduction to Hardware and Operating System** **Sep' 24**
IBM -- [Certificate Link](#)

Achievements

Achieved the top position in the University French [Examination](#). **Jan' 26**
Successfully solved over 100 algorithmic problems on [LeetCode](#) to enhance problem-solving skills **Since May' 25**

Technical Skills

Languages: C++, Java, Python, JavaScript, SQL

Technologies/Frameworks: Fast API, Flask, Flask-Login, SQL Alchemy, Jinja2, XGBoost, FAISS, SHAP, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, SciPy, Bootstrap, Git, GitHub, Excel, Power BI

Skills: REST API Development, Machine Learning, Data Analysis, Data Preprocessing, Feature Engineering, Model Evaluation, Statistical Analysis, Explainable AI, Retrieval-Augmented Generation (RAG), Data Structures and Algorithms, DBMS, Problem Solving

Education

Lovely Professional University Punjab	Aug' 23 Present
Computer Science and Engineering — CGPA: 7.36	Jalandhar, Punjab
Archana Children's Academy	Mar' 21 – May' 22
12th with Science — Percentage: 73.40	Jaipur, Rajasthan
Archana Children's Academy	Mar' 19 – May' 20
10th with Science — Percentage: 83	Jaipur, Rajasthan
